

JOHN EDUARD DE VILLA

BSIT Student (Business Analytics) | Aspiring Data Engineer

johneduarddevilla09@gmail.com | +63 970 300 3516 | Nasugbu, Batangas, Philippines

PROFILE

4th-year BSIT student majoring in Business Analytics, with coursework spanning enterprise data management, database systems, and analytics modeling, paired with hands-on experience designing relational schemas and building data-driven systems for real clients. Comfortable working across the data lifecycle from collection and storage to modeling and reporting with a practical, self-directed development workflow.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript, C#

Databases: MySQL, MariaDB, Relational Schema Design, Advanced DBMS Concepts

Data & Analytics: Power BI, Tableau, Data Modeling, Big Data & Distributed Processing Concepts, Statistical Analysis, forecasting (SARIMA, XGBoost)

Backend & Integration: Node.js, PHP, Laravel, CodeIgniter, REST APIs, Systems Integration & Architecture

Infrastructure & Tools: Docker, Git/GitHub, Networking, Linux (Omarchy, Mint, Ubuntu, Fedora) & Windows; Claude Code, OpenCode, Cursor, GitHub Copilot

RELEVANT COURSEWORK

- Fundamentals of Enterprise Data Management, Advanced & Basic Database Management Systems, Analytics Techniques and Tools
- Fundamentals of Analytics Modeling, Fundamentals of Business Analytics, Data Analysis, Systems Integration and Architecture

EXPERIENCE

Freelance Full-Stack Developer - HILOM EHR

2025 - 2026

Commissioned by 2nd-year nursing students as their semestral project; now being developed and polished for sale to a legitimate medical center

- Designed and maintained a relational schema spanning 28+ tables, ensuring referential integrity and consistent data propagation across clinical, admin, and billing modules
- Built audit logging covering 14 distinct action types to support data traceability and compliance reporting
- Implemented field-level AES-256-GCM encryption for sensitive patient data and PII sanitization as part of sale-readiness data governance work
- Led full-codebase remediation including data integrity fixes (foreign key mismatches, duplicate routes, cross-module data sync issues)

DATA-ORIENTED PROJECTS

- LayRate (Capstone, In Progress) - Developing an offline poultry farm egg-production monitoring system on Raspberry Pi 5 + Arduino (DHT22, IR break-beam sensors); building the data pipeline from sensor ingestion through MySQL storage, with SARIMA/XGBoost forecasting in development for production trends
- Talent Scout AI - AI-powered job-matching platform; designed the underlying data model connecting applicant profiles and job listings for the Nasugbu, Batangas job market
- HairConnect - AI-powered recommendation system; structured rating and review data to drive recommendation logic for barbershops and salons
- Plant Selling & Management System - Java desktop application with relational data model for POS, inventory, and shipping tracking

CERTIFICATIONS

- Microsoft Certified: IT Specialist - Data Analytics, Databases, Device Configuration & Management (Windows 10) (Certiport, 2025 - 2026)
- Cisco Networking Academy - Data Science, Data Careers, Data Analytics Essentials, Data Gathering & Collection, Basics of Analytics, AI/ML Concepts, AI Fundamentals (IBM SkillsBuild), CCNA Essentials, Packet Tracer (2024 - 2025)

EDUCATION

Bachelor of Science in Information Technology, major in Business Analytics

2023 - 2027

Batangas State University - ARASOF Nasugbu
